Case #48

The Board concurs with the request of the Superior that the priest be allowed to reside in Boston under the supervision of his Superior contingent upon a report to the Delegate's Office on the outcome of the follow up neurological testing. It should be re-presented to the Review Board. There will be no ministry.

CASE #33

The Board recommends that he continue: a) to be on sick leave, b) live out of state, c) not do any ministry.

The Board further recommends that the Bishop of the area where he resides: a) be informed about his presence and his inability to carry out priestly ministry, b) be asked permission for him to live there, c) be asked to appoint someone to contact the priest on a regular basis in order to insure that he is not carrying out ministry.

The Board will be informed about the Bishop's acquiescence or not in this regard.

CASE #50

The Board recommends that the priest not be assigned to parish ministry, continue in spiritual direction ~~and~~, because of his strong priestly identity, that he be assigned to a ministry in which he would not have regular contact with youth, e.g. a position within the administrative sector of the Archdiocese. This shall not include public ministry.

The Review Board will review this case when and if an independent assessment is submitted to the Delegate.
